HIGHLIGHTED STUDENT RESEARCH

Density-dependent winter survival of immatures in an irruptive raptor with pulsed breeding

R.A. McCabe · J.-F. Therrien · K. Wiebe · G. Gauthier · D. Brinker · S. Weidensaul · D. Reid · F.I. Doyle · K.-O. Jacobsen · T. Aarvak · I.J. Øien · R. Solheim · G. Fitzgerald · N. Smith · K. Bates · M. Fuller · E. Miller · K.H. Elliott 295

Environmental conditions variably affect growth across the breeding season in a subarctic seabird

D. Sauve · A. Charmantier · S.A. Hatch · V.L. Friesen 307

CONCEPTS, REVIEWS AND SYNTHESSES

Selection of predictor variables for species distribution models: a case study with an invasive marine bryozoan

C.J. Pratt · D. Denley · A. Metaxas 319

VIEWS AND COMMENTS

No statistical evidence that honey bees competitively reduced wild bee abundance in the Munich Botanic Garden—a comment on Renner et al. (2021)

L.D. Harder · R.M. Miksha 337

Statistical evidence that honeybees competitively reduced wild bee abundance in the Munich Botanic Garden in 2020 compared to 2019

S.S. Renner · A. Fleischmann 343

PHYSIOLOGICAL ECOLOGY

Climate variability supersedes grazing to determine the anatomy and physiology of a dominant grassland species

S. Bachle · J.B. Nippert 345

Heterogeneous isotope effects decouple conifer leaf and branch sugar $\delta^{18}\text{O}$ and $\delta^{13}\text{C}$

R.P. Fiorella · S.A. Kannenberg · W.R.L. Anderegg · R.K. Monson · J.R. Ehleringer 357

BEHAVIORAL ECOLOGY

Size-dependent growth tactics of a partially migratory fish before migration

R. Futamura · K. Morita · Y. Kanno · S. Kumikawa · Y. Matsuoka · A. Okuda · H. Sugiyama · H. Takahashi · J. Uchida · O. Kishida 371

Resources and predation: drivers of sociality in a cyclic mesopredator

R. Erlandsson · M. Hasselgren · K. Norén · D. Macdonald · A. Angerbjörn 381

POPULATION ECOLOGY

Sea ice extent and phenology influence breeding of high-Arctic seabirds: 4 decades of monitoring in Nunavut, Canada

S.E. Gutowsky · J.E. Baak · A.J. Gaston · M.L. Mallory 393

Climate affects the outbreaks of a forest defoliator indirectly through its tree hosts

K.J. Haynes · A.M. Liebhold · J.S. Lefcheck · R.S. Morin · G. Wang 407

PLANT-MICROBE-ANIMAL INTERACTIONS

Wild legumes maintain beneficial soil rhizobia populations despite decades of nitrogen deposition

C.E. Wendlandt · K.A. Gano-Cohen · P.J.N. Stokes · B.N.R. Jonnala · A.J. Zomorrodian · K. Al-Moussawi · J.L. Sachs 419

COMMUNITY ECOLOGY

Flock-species richness influences node importance and modularity in mixed-species flock networks

P. Bangal · H. Sridhar · D. Shizuka · L.N. Vander Meiden · K. Shanker 431

Correction to: Flock-species richness influences node importance and modularity in mixed-species flock networks

P. Bangal · H. Sridhar · D. Shizuka · L.N. Vander Meiden · K. Shanker 441

Herbivore-induced plant volatiles, not natural enemies, mediate a positive indirect interaction between insect herbivores

E. Frago · R. Gols · R. Schweiger · C. Müller · M. Dicke · H.C.J. Godfray 443
